

## 1200 Series V-Leg Stacking Student Chair Product Specification

**FRAME:** Integrated back/seat/leg design provides classic look and maximum strength. Frame is formed of two parallel 1" 18 gauge tubes that are welded together underneath the seat. U-shaped back is carefully contoured to the plastic to ensure maximum screw engagement and strength. CDF uses a process which maintains the tubes under compression for maximum durability. Slight extension of rear legs provides a "wall saver" feature.

**SEAT and BACK:** The frame is contoured to fit the shape of the 5/8" Melsur™\* solid seat. Solid plastic is stain/wear resistant and self-extinguishing. The seats and backs are attached with steel rivets underneath the plastic resulting in no exposed hardware on the surface. The 5/8" Melsur™ seat has a waterfall edge to improve seating comfort.

**BRACES:** 5/16" wire braces welded to legs provide compact stacking.

**METAL FINISH:** Bright nickel chrome plating meets all present requirements for noncorrosive and abrasion resistant finishes.

**GLIDES:** High shoulder nylon glides with an internal gripper spring. Glides are 1 ¼" diameter and a 40 degree full-swivel with a ½" shoulder. Steel glides are optional.

**HEIGHTS:** Fixed 12", 13 ½", 15 ½", 17 ½" or Adjustable 13" – 17".
