

5300 Extra Large Tablet Combo with Book Basket Product Specification

FRAME: Legs are 1 ¼" heavy-duty 16 gauge tubing – two gauges stronger than the competition. Gas shield metal arc welding of joints provides exceptional strength. Additional brace extends from desk top frame to the back of the chair to provide a full length support for the extra large tablet.

SEAT and BACK: The frame is contoured to fit the shape of the 5/8" Melsur™* solid seat. Solid plastic is stain/wear resistant and self-extinguishing. The seats and backs are attached with steel rivets underneath the plastic resulting in no exposed hardware on the surface. The Melsur™ seat has a waterfall edge to improve seating comfort.

BOOK BASKET: ¼" wire dual access 13" x 11" x 8" book basket.

TABLET TOP: Top is oversized 20" x 36" Melsur™ 5/8" solid plastic with a pencil groove.

METAL FINISH: Bright nickel chrome plating meets all present requirements for non-corrosive and abrasion resistant finishes.

GLIDES: High shoulder nylon glides with an internal gripper spring. Glides are 1 ¼" diameter and a 40 degree full-swivel with a ½" shoulder. Metal glides are optional.

HEIGHTS: Fixed 17 ½".

* World's leading manufacturer of solid plastic desktops and seats.
