

# SCHOLAR CRAFT™

## SC620 Series

### Overview :

Heavy duty, high density polyethylene material with a light grain surface. Injection molded into a one piece shell unit with heavy duty reinforcing ribs as well as molded slots to accommodate the twin back support tubing. This design allows no exposed hardware on the surface and adds strength and durability.

Front legs and tablet arm support formed of 1-1/4" 14 gauge steel. Back legs formed of 1-1/4" 16 gauge tubular steel. Twin back supports formed of 3/4" 14 gauge steel. Integrally MIG welded throughout for maximum strength and minimum stress. Bookracks are made of 1/4" welded steel rods. The flat usable surface is chromed having a book stop on one side, which makes a neat, spacious compartment. Bookrack is welded at all four corners to unit to assure maximum support. The glides are silent, rubber cushioned, swivel of self-leveling 1" minimum diameter hard carbon steel - nylon base type with a flat bottom, chrome plated

Work surface to be 18"x24" made of Melsur® solid plastic consisting of wood flour and Melamine resin with binder component to assure a durable, smooth surface or fiberboard, 5/8" - 47 lb. core with NEMA approved high density plastic laminated surface and phenolic backer sheet

120 Series Poly / 100 Series Poly
