

SCHOLAR CRAFT™

SC880 Series

Overview :

Melsur® solid plastic, 3/8" thick made of wood flour and Melamine resin with binder component to assure a durable, smooth surface. Seat and back is double contoured to enhance correct posture. Seat has a large waterfall front edge for comfort. High impact contoured spacers are located between the metal tubing and the solid plastic seat and back to allow correct positioning and shock absorbency. Seats and backs are attached with chrome rivets completely through the metal frame. Work surface to be 18x24", made of Melsur® solid plastic consisting of wood flour and Melamine resin with binder component to assure a durable, smooth surface.

Front legs and tablet arm support formed of 1-1/4", 14 gauge steel. Back legs formed of 1-1/4", 16 gauge tubular steel. Continuous tube twin back supports are formed of 3/4", 14 gauge steel. Integrally MIG welded throughout for maximum strength and minimum stress. Wrap around brace is constructed of 3/4", 16 gauge steel welded to the back and arm support for maximum strength. Bookracks are made of 1/4" welded steel rods. The flat usable surface is chromed having a bookstop on one side, which makes a neat, spacious compartment. Bookrack is welded at all four corners to unit to assure maximum support. The glides are silent, rubber cushioned, swivel of self-leveling 1" minimum diameter hard carbon steel - nylon base type with a flat bottom, chrome plated.
